

INOSA

Together with RamBase

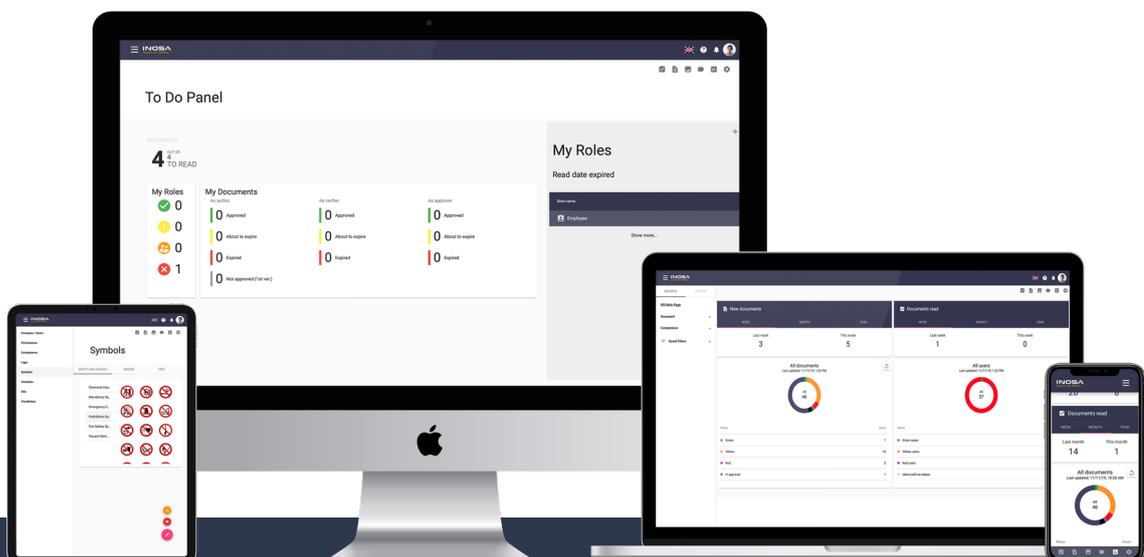

Standardise & Visualise

This is INOSA:

INOSA is a management- and quality system, designed to make your workday safer and easier. The system is based on the LEAN mindset, helping you to streamline your processes, maintain communication with employees, and comply with health and safety requirements.

INOSA might be right for you if:

- 1 You need documentation that employees have read and understood important procedures.
- 2 You need to know which of your employees who are up to date on the latest safety instructions.
- 3 You need an overview of the actual competence in the company.
- 4 You need instructions on how a task is performed to be easy to understand, also for people with reading difficulties or language barriers.
- 5 You need a system to log incidents, calculate risks and decide follow-up actions.

Functionality in INOSA

Visual documents

Documents made with visual elements are easier to read and understand. With INOSA, you can easily create visual documents using images, symbols, flow models and videos.

Process models

INOSA's process model tool gives everyone an overview of how different tasks depend on each other, and the order of the tasks in the workflow.

Read more: <https://inosa.no/en/software/process-models/>

Competence

INOSA's competence tools makes it easy for employees to know what different instructions they should always familiarize themselves with. Management receives an overview and documentation of who are always up to date.

Incident Management

With INOSA you can easily record, report and process nonconformities. The system ensures that the cause is defined and that the actions that should be carried out are given priority.

Action log

By gathering all types of actions in the enterprise in one action log, one facilitates the work of registering, following up and evaluating the actions. Clear and effective follow-up of actions enables continuous improvement work.

3 good reasons to choose INOSA

1

Overview

INOSA's management tools are easy to manage and easy to use. Use of images and videos ensures effective learning and good overview.

2

Availability

INOSA is available on all devices – screen, tablet and phone. It gives you access to work instructions and procedures wherever you are.

3

Safe storage

Data storage at INOSA takes place safely in the cloud. We use reputable providers such as Amazon Web Service and MS Azure.

INOSA simplifies management

INOSA makes management easier by automating tasks and creating overview. Employees are automatically notified when relevant procedures are updated, based on their role in the organization. The management sees which employees have read the new procedures and through quizzes, INOSA tells you who understood the procedures,

The visual instructions and one point lessons makes INOSA an excellent training tool. It is possible to enter clickable one-point lessons within a standard operating procedure, showing specific tasks such as "How to start this pump" or "How to register a travel bill or sick leave".

INOSA is updated by its users. When someone comes up with a good way to solve a task, it is standardized through instructions. This creates organizational competence and makes the business less dependent on individuals. It also ensures continuity across shifts and different locations.

Hear from some of our costumers

INOSA is already helping businesses of all sizes to achieve a safer and more efficient workday.

Hydro

Hydro Aluminium

With INOSA, we're working smarter, faster, and more environmentally friendly. A simple and intuitive user experience makes the system a tool for continuous improvement, and gives us value for the time and effort we invest. INOSA works as a platform where we define how we run our business to the safest possible degree for our employees. We do this by creating interactive and user-friendly procedures. Due to the low complexity of the system, the people who actually perform the work daily can create and maintain all necessary procedures themselves. This helps to strengthen the ownership and commitment to the entire concept.

Kjellbjørn Fossheim

Hydro Aluminium

JWS Gruppen

In a hectic everyday life in a demanding market, we need systems that ensure our and the customers' requirements for HSE and quality. INOSA does!

Kenneth Jansen

General Manager

Eramet Norway

Low user threshold for establishing and revising documents, and for a regular user to read documents. INOSA is easy to get in touch with, and manage our wishes quickly and efficiently.
